

New Project for Biognosis

ERASMUS+ KEY ACTION 2

Innovative Integrated Training in Healing Plants

Total Business Plants

The Project will provide a competence based training program, for total management of aromatic & therapeutic plants cultivation and handling.

It is specially designed for farmers, habitants of rural areas, farmers associations, small local enterprises, and any other who would like to increase its income by cultivating or shelling medicinal plants.

The project will focus on:

- Organic farming techniques in aromatic and therapeutic plants cultivation.
- Certification procedures of the production process.
- Business orientation for expanding in new markets.
- Online medical plants encyclopedia for alternative ways of healing and improving general health status in humans.

Provided through web tools & mobile apps.
